DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- 3, 9, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Moorehead U.S. Pat. No. 5,147,332.

Moorehead discloses a catheter having a central lumen, the catheter including a plurality of longitudinal struts (portion of catheter in between the apertures) and longitudinal apertures (66 and 70), the struts and apertures interspaced around the circumference of a proximal portion of the catheter (fig. 14; Note applicant has not defined what he regards a the proximal portion); and a self-sealing polymer (62) disposed on at least a portion of each strut (fig. 14), the polymer separably sealing the struts one to another (fig. 14), wherein the struts separate to allow passage of a fluid into or out of the central lumen, and wherein the struts reseal to prevent passage of a fluid into or out of the central lumen (fig. 14); as to claims 2-3, 9, 12 (Narrowly eyeshaped is a relative term) and 14, (fig. 14).

Art Unit: 3763

Allowable Subject Matter

Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 4/2/05 have been fully considered but they are not persuasive.

Moorehead is proper because it clearly discloses each and every element recited in the claims. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "catheter 710 includes a plurality of longitudinal struts 711 and longitudinal apertures 712 interspaced around the circumference of the proximal portion 713 and paragraph 0052 state that "balloon 730 is operably attached to a distal portion of catheter 710," (emphasis added) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Simply, any portion not at the distal end can be regarded as a proximal portion.

Proximal and distal portion have not been clearly defined in the specification and/ or claims. Furthermore, Moorhead states that the apertures are distances from the distal end of the catheter (abstract).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin C. Sirmons whose telephone number is 571-272-4965. The examiner can normally be reached on Monday-Friday 6:30-4:00 ALT FRI.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
